3 References, citations and authors descriptions

Citations: use IEEE Citation Style: numbers enclosed in square brackets (e.g.: [1], [2], [33]).

References: use IEEE Citation Style. Use numbers enclosed in square brackets for each reference.

Reference numbers are set flush left and form a column of their own, hanging out beyond the body of the reference. The reference numbers are on the line, enclosed in square brackets. In all references, the given name of the author or editor is abbreviated to the initial only and precedes the last name.

References may not include all information; please obtain and include relevant information. Do not combine references. There must be only one reference with each number. If there is a URL included with the print reference, it can be included at the end of the reference.

In the References section are presented references to a paper in proceedings [1], to an article [2], to a book [3] and to an online journal article [4].

Citations should be numbered in the order they appear in the text. All references must be detailed in the Reference/Bibliography section. Avoid using footnotes, as they may interfere with final formatting of the paper.

All references have to be cited within the paper; otherwise they will be removed from the reference list.

For each author include a small face picture (3 x 2.5 cm) and a short description including (but not limited to): affiliation, education, research field(s). The authors' description is mandatory for the papers to be published.

4 Reviewing process

All papers will be subjected to peer review and are expected to meet standards of academic excellence. A blind review process will be used, employing 2 or 3 scientific reviewers. Author(s) will be notified about the outcome via email, using the declared address.

The bibliography and references must comply with the above requirements. These are the eligibility criteria for the assessment process.

5 Conclusions

Paper should end with conclusions.

6 Acknowledgment

The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g”. Put applicable sponsor acknowledgments here; DO NOT place them on the first page of your paper or as a footnote.
